

Education

Education is a very important topic. Education is very important for each child to have. Education will impact the child first part of life. School is something that they should grow up with and be familiar with. We can change a child's whole life by just helping them get into school and helping them into college. We believe that every child/teen should finish all of high school and no one should be able to drop out. We also believe that kids should have punishments, such as the paddle, in school if they act out. Also, teachers impact how the your kids learn and, sometimes, even impact your child's life.

We care about your education and teachers, so we want to make sure that every child gets to go school. We are going to make it mandatory that all children finish with a high school degree, no student will drop out of high school. We think the every student deserve a chance to go to college and we will help them achieve their goals if they don't have the money to do so. We know how important it is for children to have an education and we want each child to have that experience.

Also, we think that kids in elementary school should be punished if they do something bad. We need to teach them how to act at an early stages, so when they get to high school they know how to act. they are not distractions for other students. The teens are the future of America, so we want them to have a get education and a chance to follow their dreams. Schooling teaching kids not just knowledge, but life lessons that they need to know.

Teachers are a huge part of education, so we will fund money into helping the schools budget. Teacher funding should also be evenly funded around the United State, so that the job of a teacher is the same, even in different states. Teachers are very important in the students' learning. They should be paid more for all that they do. Teachers have to get a college degree and finish high school, but some people are getting pay more just to flip burgers. Teachers deserve to get pay a good amount of money for all the work that they do.

To conclude, education is a topic that we want to improve. The kids are the future of America and it all starts at an early age in school. We want to help every kid get an education or get a chance for an education. We also want to make sure that every child in America finish school with at least a high school degree. School would bring back punishment if the student is acting out in class because we don't want them being a distraction to someone else's learning. Lastly, teacher should be given more respect and funding. Teachers help form our teens and they work hard, so they deserve a great paycheck. Education is something WE can fix if you would let me.
