

Immigrations

Immigration has become a social issues in our country over the years. Immigrants have been coming into our country over the years and it is starting to become an issues in The United States of America. We are doing our best to help the issues and to make immigration less of an issues in our lives. We will help stop immigration by having stronger boards/ easier processing, be able to know basic english/ civics background, and the amount of years you have to live in the United States is the same.

The first thing that we will do to control the immigration rate is to put up stronger border. What this will do is control the amount of people that enter in America, it will cause the people to have to go through the process to become and America but we will also make this process simpler and less complicated and will give people a chance in America and give them hope. We will insure that all immigrants coming into America will be able to speak english this will not only help in everyday life but it will also help teachers in school understand their students and in the workplace so workers and bosses will have a better communication. This will insure in a better and forward moving America with the immigration process.

To continue, when immigrants come into America a good portion of them do not know english, the normally speak another language so in this case we want them to be able to speak basic english so we will be able to speak to them and us without a translator. We will help those who can not speak english with night class. We decided on night class for those who go to school or work during the day will be able to go and take a class to learn english. We are not asking them to be able to know all english and be the best but to know enough so when they talk people can understand them and so we can also understand them. We will also put in that they will have to know American history and civics so they will know about America and what is going on in our life.

Lasty, how long they immigrants will have to live here we have to decide to keep the same. Right now you have to live in America for five years to become a citizen and three if you are married to an American citizen. We have decided to keep this the same to make things less complicated, to keep things simple for them. We do not want it to complicated that they can not become a citizen but to not just let them im freely.

In the end, we are not against immigration we are for it, but we are changing some of the rules and regulations so we will not have so many immigrants coming in. We want to help them as much as we can and we have set these rules to insure that we will not have too many people coming in. As a nation we are here to help them, we want them to have a better life and a better future, to have hope and faith.
